

# Gate Instructions

**Your actuator** for the back gate will work on the right lane of the front gate, also. Residents who do not have actuators should check with John Gonzalez, Treasurer (528-5855) to obtain one.

Actuators are not needed to exit either front or rear gates. In all cases, be sure to pull up to the cut lines in the street to activate the hot strips.

**Guard Screening** will take place for those entering Country Club Estates who do not have actuators. The guard has a list of residents and will call to get a resident's approval before guests are allowed entry unless you notify the guard prior to their arrival. The guard also has a list of service people that the residents/owners have pre-approved for entry.

**Guests Entering After Hours to the Neighborhoods Off Country Club Drive** between the hours of 8:00 p.m. and 6:00 a.m. must scroll to your name on the alphabetized list of residents on the computer screen located just past the guardhouse on the median. There will be a four-digit code by your name (no phone number will appear). When you answer your phone, instruct your guest to go immediately to the gate, staying in the left lane for visitors. Give

them time to get to the gate (a few seconds) and then dial "9" and hang up your phone. The gate will open. (If you chose not to open the gate, just simply hang up.)

**Guests Entering Presidential Cove After Hours** should follow the instructions in the above paragraph. Remind your guest to turn left to the Presidential Cove entry. You must dial "5" and hang up your phone for the gate to open.

**Exiting Country Club Estates:** All exit gates will automatically open as you approach slowly.

**Front Gate:** Pull up within 2 feet and press the actuator button and the gate should open. If the RED light does not come on, you may need a new battery. One may be purchased at Radio Shack, K-Mart, Publix, etc. If you drop your actuator or get it wet, it may not work. They are not guaranteed. If you need a new one, you must return the old one to purchase a replacement for \$30.00. If the actuator is lost or stolen the cost is \$175.00 for a new one.

**Guardhouse Phone Number :**  
**344- 8038**
